

Custom Neuter Bow Keys

*Be visible to your customers ...
several times a day!*

Repeat business is almost guaranteed.

- The unique bow shape makes keyway recognition more difficult for “non-professionals”, helping to assure repeat business for you.
- No manufacturer brand or keyway identification.
- 500+ commercial and residential keyways available.
- Low minimum order quantity.
- Promotes your business.

Follow these four simple steps to order:

1. Refer to “**ILCO Key Number**” and “**Material/Finish**” (pages 4-24) to determine the product order number.

*Example: Ilco keyway number 1179 + brass material/finish = **CCNB-1179-BR***

2. Specify what is to be stamped on both the thumb (**T**) and finger (**F**) sides of the key.

Repeat customers may indicate the die numbers (if known) and a brief description of those dies, business name, telephone number, any other identifying information, or may submit copies of both sides of the key. The packing list provided with each shipment indicates the thumb (**T**) and finger (**F**) side dies that were used to produce the keys that were ordered, as well as an abbreviated description. If you require assistance, please contact Ilco Customer Service.

New customers, or customers requiring a change in their dies, please refer to the “Artwork” section (pg. 2).

3. Indicate how many you are ordering. (Minimum order is 250/item).
4. Submit your completed order to your Ilco distributor.

Terms used for Custom Keys

Embossed: A result of the process where the text or image appears raised on the surface of the key. (As on any U.S. coin).

Note: Embossing both sides of a key may result in less than desirable results as there is limited material to spread. When seeking to place an image or text on both sides of a key, if you elect to emboss the text or image on the surface of one side of the key it is generally advisable to incise the other side. Text may be incised on both sides of a key with no difficulty.

Incised: Normally restricted to text. A result of the process where the text is depressed into the surface of the key.

Thumb (T) and Finger (F) side: When holding a key between the thumb and index finger of the right hand, with the bitted or cutting edge facing upward, the thumb rests on the thumb side of the key. The index finger rests on the finger side.

Materials: Most neuter bow keys are available in bright brass material (**BR**), nickel plated brass (**NP**) and nickel silver material (**NS**). Although nickel silver is more costly than brass or nickel plated brass, we recommend the use of nickel silver where the key profile is thin (as on many sectional keys) or where there is a history of breakage.

Stock Dies: We have the following dies available for your use at no charge:

Ordering New Artwork

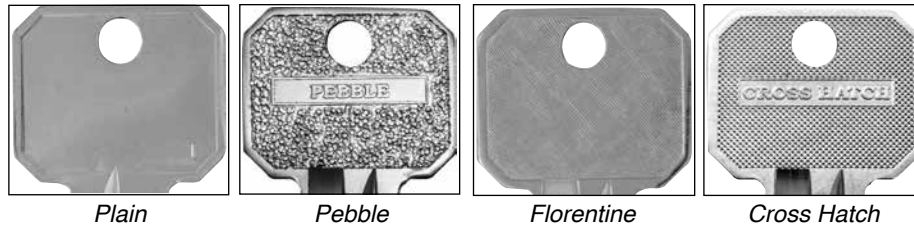

If you want strictly text, please type or print clearly, using upper and lower case characters as you want them to appear. Indicate if and where you want bold face type used.

If you want a logo or a special font, provide us with a clear black & white copy of your artwork when you place your first order. Artwork will be prepared from what you submit and sent to you for signed approval before we will make tooling. Artwork design typically takes about 5 working days. Providing us with contact information will allow us to send images and receive customer approvals electronically.

Note: The most common mistake that people make is trying to fit too much information on the head of the key. "Less is more" and "keep it simple" are good things to keep in mind when planning your key design. The actual surface area available is roughly $\frac{3}{8}$ " high and $\frac{3}{4}$ " wide.

If you are considering stamping both sides of the key, we caution you against both sides being embossed. Please consider having one side embossed and the opposite side incised (see terms used for custom keys). This typically results in a better looking key.

Choose your background. Some customers feel that a background adds to the overall good look of the key. Select smooth, cross hatch or pebble from the images shown. Backgrounds are available only on embossed dies. Only the smooth background is available on incising dies.

First Time Order Minimums (New dies required)

The initial order minimum is 1,000 keys. This may be divided among different keyways as long as there is a minimum of 250 / keyway.

Packaging

These keys are packaged 250 keys / bin pack box, 1,000 keys / case.

Shipping time

Orders requiring new die tooling ship within 20 working days after our receipt of approved artwork. Reorders ship within 10 working days.

General Information

All Custom keys are made to order and may run up to $\pm 10\%$ of your order quantity. We will ship and invoice for the exact quantity shipped. For example, if you order 250 keys we may ship as few as 225 (250-10%) or as many as 275 (250+10%). We would consider this order complete and would invoice you for the exact quantity that we ship.

“Ownership” of Dies

When new dies are created we may invoice a ‘die design fee’. This nominal fee covers the expense of designing the die layout and the programming to manufacture the die(s) necessary to produce the order. ***The physical die itself is the property of Ilco as Ilco is responsible for maintaining and replacing these dies as necessary.***

Dies are linked only to the telephone number, name or logo that is on the die. Ilco does not attach ownership of any die to any particular distributor. Any end customer may choose to order from distributor “A” one time, and distributor “B” the next time, utilizing the existing dies bearing their information.

Need a key you do not see listed? We are constantly adding new residential and commercial keyways to our neuter bow program. Should you need a keyway that you do not see listed, please check with our Customer Service department for the latest availability.

- (1) While nickel silver material is strongly recommended for all sectional keys because of its greater resistance to twisting and breakage, this key is available only in nickel silver.
- (2) The standard Ilco neuter bow Kwikset key (number CCNB-1176--) is the dual purpose 1176/KW1 & A1176ST/KW10 key with staggered shoulders. If you want the neuter bow key that has even top and bottom shoulders and will operate only the 5 pin kwikset locks, please order key number CCNB-1063KW--).
- (3) These keys are manufactured in 7 pin length.

* All OEM and competitors key identification numbers are provided for reference only. While we strive to provide accurate information, always compare the original to the key profile shown in the Ilco Key Blank Directory before ordering.

Need a key that you do not see listed? We are constantly adding new keyway availability. Check with the factory to see if the one you are seeking is available.

Custom Key Design Charges

One time die design fees, prices are for each individual die:

Text Only: \$150.00

Logos or complex text/design: \$200.00

Plain, pebble or smooth backgrounds are at no additional charge. For the florentine background: add \$50 per die. Choosing the Forentine background may add several days to our die manufacturing time.

Die design fees are waived if the initial order is for 5,000 or more keys.
