The Jacket Auto Remote Cover™

The Jacket Auto Remote Cover™ provides protection for expensive automotive remote FOBS from wear, scratches and breaks. Jackets are made of lightweight silicone, much like the protective cell phone covers that are popular with consumers.

Unlike competitive products that are limited to a few generic styles, The Jacket has been designed to provide a “snug”, custom fit for FOBS.

20 different styles are available, each in 3 popular colors (Black, Blue, Pink). The Jacket Auto Remote Cover™ may be purchased individually, in a box containing 6 pieces (same style and color), or choose from three assortments.

Available Colors

Ordering Example:
Jacket part number - Color
DDGA55-BLUE

OPEN STOCK:

Clam Shell Package, 1 per pack,
