

Code Maker for Futura Series

This exclusive software for creating cards that are not yet in the Silca database is now available for the Futura Series (Futura, Futura NA, Futura Pro) of electronic key cutting machines.

What is Code Maker and why do you need it?

Code Maker is an optional software functionality for the Futura series (Futura, Futura NA, Futura PRO) allowing the key cutter to create cards for keys not yet available in the Silca Database. Once purchased Code Maker is accessible via the Futura tablet and activated by updating the Futura software. It can then be used off-line without an internet connection.

What types of keys are supported?

With Code Maker you can create cutting cards for both flat and dimple keys. The creation of cutting cards for laser keys is not supported.

Remember that it is important to provide the distributor with the Futura serial number when placing your order.
