Any controversy shall be settled by the Courts of Justice where the company has its headquarters, with express exclusion of any other court. Brand names and/or trademarks shown are the intellectual property of the respective companies

THE T-CODE PRO

Key Programming System

The T-Code Pro is the leading vehicle key and remote programmer for most vehicle makes and models worldwide. Designed and engineered in the UK by Advanced Diagnostics, the pioneering and trustworthy manufacturer for aftermarket key programming tools, the T-Code Pro is ideal for auto technicians and locksmiths providing high quality key and remote programming services. All new software developed in the future must be purchased from your local distributor.

FUNCTIONALITIES

- › Read and clear fault codes
- › Clear key memory
- › Program keys, proximity keys, smart keys, flip keys, remotes
- › Program aftermarket and OEM keys and fobs
- › Read immobilizer pin codes
- › Read pre-code data
- › Display live data
- › Component actuation
- › ECU identification
- › Simple user interface

Some of the functions above are make/model dependent

T-CODE PRO KIT

- › The T-Code Pro programmer
- › Software (as ordered)
- › Smartcard and calculator
- › Protective carrying case
- › Neoprene tester case
- › Operating manual
- › Cables and dongles
- › Dongle case

TECHNICAL DATA

Power: 12v DC from vehicle

Display: 320x240 pixel backlit LCD touch screen with adjustable contrast

Connection: via OBD socket in vehicle

Interface: CAN bus, USB

Multiple system protocols

Dimensions: Length: 10.31"/262mm, Depth: 8.58"/218mm, Height: 1.85"/47mm

Weight: 2.4lbs/1.09kg

T-CODE PRO

A new opportunity for your business

The T-Code Pro can be a worthwhile asset and generate an excellent return on investment, by opening an additional income stream to your business; that of vehicle key and remote programming using specialist diagnostic equipment, a service originally provided almost exclusively by franchised dealers.

High quality and reliable solution

Advanced Diagnostics develop and manufacture all their products to the highest standard, providing you the latest innovative tools used by professional locksmiths in the marketplace.

Easy to use advanced technology

Designed with simplicity in mind, the T-Code Pro is a portable device that simply guides you through various processes for key and remote FOB programming, from the more basic keys, to proximity and smart keys

Wide coverage of vehicle models, constantly updated

The software coverage offered by the T-Code Pro is extensive and is developed for most makes of vehicles currently on the market, including over 60 vehicle manufacturers worldwide. The software modules can be purchased as required, downloaded easily online and installed directly on the device.

Pin code reading function

Some vehicle immobilizer systems require security access (pin codes) to allow keys or remotes to be programmed.

Protection for your investment

The T-Code Pro is designed with built-in security which keeps your investment protected. For additional security we apply a smartcard and a calculator similar to the security devices used by the banking industry i.e. the calculator prompts the user to enter a numeric response code to the T-Code Pro during the programming procedure. The response code is generated through the smartcard once inserted into the calculator.

Smart Dongle

Smart Dongle provides 'one easy to use solution' that replaces all dongles with one automatically configurable dongle. Its built-in calculator alleviates the need for smartcards, while its extra ports support future hardware innovations.
