

2013 Ford Escape Key 2T-7W I3 Adapter Required for Tri-Code HS

An adapter (I3) and software update is necessary to clamp and gauge the 2013 Ford Escape Key (2T-7W) on the Tri-Code HS key machine. Requires software version DB9.01 or higher.

The software update accommodates the I3 Adapter, adds the 2013 Ford Escape code series (11501-13000), electronic depth and spacing to the existing database.

Tri-Code HS I3 Adapter with Software Update

Part Number: **BK0443XXXX**

I3 Adapter Only*

Part Number: **BK0441XXXX**

***Note:** We offer the adapter only as a replacement part. Software is not included with the Adapter only.

Updating Software:

A RS232 serial port is needed to update software. If your computer is not equipped with this port, you will need an "USB to Serial Adapter". To date, we have found that the *Keyspan® by Tripp Lite USB to Serial Adapter* (# USA-19-HS) to be the most compatible and reliable brand.

This product is available from several retail stores and websites or you may order directly from Kaba Ilco Corp. (Part Number: **BM0119XXXX**).
