

TRI-CODE HS USERS GUIDE Supplement

With the addition of the "D" Jaw the Tri-Code HS now has the capability of cutting both High Security (Laser) keys and standard Edge Cut (Flat) keys. With the latest software update **(1.2.023 Db 1201)** the menu now separate's the code series based on type of key (High Security/Laser and Edge/Flat cut). This update also activates the 'QUEUE FROM PC' interface with Ilco's Kreate-A-Key software.

Not all code series referenced in the Ilco Auto Truck Key Blank Reference are available in the Tri-Code database. Also, some code series listed in the Auto Truck Guide may be broken down into smaller series in the Tri-Code database (for example: Audi AH1-AH9282 is broken down as AH1-8154 and AH1001-9282, Buick Z0001-Z6000 is broken down as Z1-2000, Z2001-4000, and Z4001-6000)

You will notice that some code series are used by multiple manufacturers and may not be listed in the Tri-Code menu under every manufacturer. The code series listed under each manufacturer in the Ilco Auto Truck Key Blank Reference Guide are included in the Manufacturers Index. If a code series is not listed under the manufacturer in the Tri-Code HS database, the Notes column in the index will tell you under what manufacturer you will find the code series.

The next several pages will give a brief overview of the menu options you will see when operating the Tri-Code HS

Please refer to the Tri-Code HS operating manual for more detailed information.

SCREEN OPTIONS:

When you turn on the Tri-Code HS, the first screen will give the following options to choose from.

0 - Decode and Copy
1 - Insert the Cuts
2 - List of Codes
3 - Queue from PC
4 - Calibrations >>
5 - Maintenance
6 - Options

5.3 DECODE AND COPY - 0

Important: keys in anodized aluminum, plastic or any other material that has no electrical conductivity **CANNOT BE DECODED!** For keys of this type use only the key cutting function.

Choose the function from the main menu by placing the cursor on the "**0-Decode and Copy**".

```
0 - Decode and Copy
1 - Insert the Cuts
2 - List of Codes
3 - Queue from PC
```

Press [ENTER], the display will show:

```
0 - High Secur./Laser
1 - Edge/Flat cut
```

Select the type of key and press [Enter]

According to the choice made, the display will show:

High Security/Laser
*Make a search by **SSN** or **MFG***

```
SSN =      (Decode)
MFG =
=>
```

or

Edge/Flat Cut
*Make a search by **Card** or **MFG***

```
Card =     (Decode)
MFG =
=>
```

NOTE: Some code series may show more than one SSN or Card. Silca has developed several SSN's and new cards that are to be used only for SILCA key blanks. Please refer to the Manufacturer's Index to determine the proper SSN or Card to use.

When cutting Edge/Flat Cut keys you will notice two options available on the screen.

```
Clamp:D-2      Pos. :0
Cutt.:H158     Dial: 6
F=brass      G=Key Det.
Pcs= 1/ 1 [START]
```

1)Key material function - F=Brass/Steel. Press [F] to select the material of the key to be cut (brass or steel).
2) Key detection function - G=Key Det. This function is used to read the measurement of the key blank (stem width) in order to adapt cutting to the key blank in use. If this function is enabled it is automatically applied only to keys with two sides. Press [G] to enable this function. When the words "**G=Key Det.**" flash, the function is enabled.

5.4 INSERT THE CUTS - 1

Below is a description for cutting a key when the SSN is known for the make associated to the Lock System. Choose the function from the main menu by placing the cursor on "**1- Insert the Cuts**".

```
0 - Decode and Copy
1 - Insert the Cuts
2 - List of Codes
3 - Queue from PC
```

Press [ENTER], the display will show:

```
0 - High Secur./Laser
1 - Edge/Flat cut
```

Select the type of key and press [Enter]

According to the choice made, the display will show:

High Security/Laser
*Make a search by **SSN** or **MFG***

```
SSN =          (Cut)
MFG =
=>
```

Edge/Flat Cut
*Make a search by **Card** or **MFG***

```
Card =          (Cut)
MFG =
=>
```

NOTE: Some code series may show more than one SSN or Card. Silca has developed several SSN's and new cards that are to be used only for SILCA key blanks. Please refer to the Manufacturer's Index to determine the proper SSN or Card to use.

When cutting Edge/Flat Cut keys you will notice two options available on the screen.

```
Clamp:D-2      Pos. :0
Cutt.:H158     Dial: 6
F=brass      G=Key Det.
Pcs= 1/ 1 [START]
```

1)Key material function - F=Brass/Steel. Press [F] to select the material of the key to be cut (brass or steel).

2) Key detection function - G=Key Det. This function is used to read the measurement of the key blank (stem width) in order to adapt cutting to the key blank in use. If this function is enabled it is automatically applied only to keys with two sides. Press [G] to enable this function. When the words "**G=Key Det.**" flash, the function is enabled.

High Security/Laser codes are highlighted in green.
