Poker Pro

Poker Pro

The automatic key cutting machine for flat and cruciform keys

The Poker Pro is an entirely automatic key cutting machine for duplicating residential and vehicle keys, both with single and double-sided cuts, as well as cruciform keys with "x" type profile.

Easy to use, the Poker Pro is equipped with an optical reader, guaranteeing precise cutting results, and a system that automatically controls the carriage movements to optimize cutter use. The machine also features a compact design and allows you to keep the work station clean thanks to the protective shield that slides back inside the machine.

Laser reader for quality cutting results

The Poker Pro features a laser reader ensuring the customer's key is read precisely and the duplication is perfect. The lack of a tracer point means no contact with the machine, therefore protecting the customer's original key.

Warnings via coloured lights

Four-sided clamps

Four-sided clamps have an exclusive rotation system that facilitates the installation of a wide range of keys. Each clamp is equipped with a gauge for perfectly aligning the key.

perfectly deburred copy of the key and optimized usage of the cutter.

Visual and audible warnings

The machine features an intuitive system of led lights, flashes and beeps to notify procedure faults, such as presence of dirt on the optical reader, accidental opening of the shield while cutting, key not installed, etc. The push button panel allows you to stop and restart the cutting cycle at any moment.

Safe for the user

The cutter and the carriage stop automatically when the safety shield is opened, ensuring the operator's safety at all times.

Compact and easy to carry

Features a lightweight, portable, compact design. The ergonomic grip below the machine's body makes it easy to lift and transport. The machine comes with a fixing bracket, the ideal solution for locksmiths working out of a van.

Optimized cutter wear

Hardened metal cutter is resistant to wear and allows you to cut any side of a key in just one cycle. A specially designed control system regulates the carriage movement speed so that it is always proportioned to the strain the cutter is subject to. This means precise cuts, a

Practical and ergonomic work station

Wide protective shield that slides inside the machine body. The enclosed cutting area makes it easy to keep the work bench clean and orderly. Metal chippings are collected in the swarf tray below the carriage. The tools needed on a daily basis are close to hand thanks to the practical accessories tray on top of the machine.

Big gauge for precise positioning
